WORK EXPERIENCE

Ounje (Food Order & Delivery Platform)

Lead Developer   July 2025 - November 2025

- Developed a production-ready cross-platform mobile application using React Native and Expo for Android and iOS.
- Built scalable, reusable UI components with responsive layouts, ensuring consistent performance across different device sizes and OS versions.
- Implemented application state management using Context API and custom hooks to handle authentication, cart flow, orders, and user sessions.
- Integrated RESTful APIs to support real-time data updates, vendor listings, menus, orders, and user dashboards.
- Implemented JWT-based authentication, protected routes, and role-based access for customers, vendors, and riders.
- Integrated Paystack payment flow and handled secure transaction states and confirmations.
- Implemented location-based features, including address resolution, nearby vendor discovery, and delivery tracking.
- Optimized app performance through lazy loading, memoization, and efficient data-fetching strategies.
- Collaborated closely with backend services to align API contracts, error handling, and data models.
- Translated UI/UX designs into polished mobile interfaces with attention to usability and visual accuracy.

Talentrah

Fullstack Web Developer   Mar 2025 - Present

- Built and maintained React and Next.js dashboards with dynamic rendering and reusable component architecture.
- Designed job-matching dashboards leveraging REST APIs and real-time frontend state updates.
- Improved application performance by refactoring components and optimizing render cycles, reducing load times by ~20%.
- Integrated third-party APIs and AI-powered features into frontend workflows.
- Collaborated with designers to translate Figma designs into accessible, responsive interfaces.
- Participated in sprint planning, peer reviews, and feature documentation.

Aquantuo Nigeria – Lagos, Nigeria

IT / Operations Analyst   January 2024 - February 2025

- Built internal tools and dashboards that automated manual operations, reducing processing time by 30%.
- Provided technical support for internal software, CRM tools, and logistics systems.
- Designed internal tracking dashboards using automation scripts and REST data sources.
- Collaborated across engineering and operations teams to streamline product workflows.

Appointed Time (Home & Building Materials Retailer)

Fullstack Web Developer   January 2020 - February 2021

- Built and maintained a modern web portal for showcasing building and electrical materials with dynamic product listings.
- Integrated a custom content management system that enabled staff to update product info without code.
- Implemented a simple yet effective inventory tracking module with real-time updates.
- Optimized the site for mobile users, increasing engagement by 40% from mobile devices.
- Helped transition the store's POS system to a cloud-based solution with synced web and in-store inventory.
- Trained staff on digital tools and supported the integration of customer support features online.

EDUCATION

ENUGU STATE UNIVERSITY OF SCIENCE AND TECHNOLOGY

B.Sc.   Sept 2018 - Dec 2022

PROJECTS

NemeBlog ↗   June-12-2025 - June-27-2025
- Built a dynamic, SEO-optimized blog application using TypeScript, React, and Sanity.io CMS.
- Designed and developed a fully responsive platform centered around themes like relationships, health, education, and self-growth.
- Integrated dynamic routing, pagination, and category-based filtering, while leveraging Sanity's GROQ for structured content querying.
- Implemented clean, semantic markup and metadata optimization to enhance discoverability on search engines.
- The result is a performant, scalable blog with real-time CMS integration—perfect for content teams and editorial workflows.

Ounje Landing page ↗   July 2025 - July 2025
- Developed the Ounje landing page using Next.js, React, and Tailwind CSS, featuring SEO optimization, modular components, and Framer Motion animations.
- Designed a clean, appetizing UI with warm color tones, responsive layouts, and clear CTAs to drive vendor signups and app downloads.

Bytco (Crypto Trading Landing Page) ↗   May-2025 - May-2025
- Designed and developed a responsive landing page for a cryptocurrency trading platform using HTML, CSS, and JavaScript.
- The project highlights key features, market trends, and user benefits through sleek UI design and smooth animations.
- Optimized for mobile and desktop, it ensures fast load times and cross-browser compatibility—delivering a polished user experience and high engagement.

Minimalist Landing Page   April-12 - April-14
- This is a minimalist, responsive landing page built with React and Tailwind CSS, designed to present products, services, or personal brands with clarity and elegance.
- The app features a sleek white theme that emphasizes simplicity and readability, making content stand out without visual distractions.

Beekays ↗   April-2025 - May-2025
- A sleek, responsive landing page designed to introduce a trust-driven platform for discovering and connecting with local businesses.
- The page highlights core services (business owners, contributors, registrars) and key value propositions like transparency, community feedback, and local visibility.

SKILLS

- React-Native, React.js, Next.js (App Router & Pages Router)
- React Hooks, Server Components, Client Components
- Global State managment
- React Router
- JavaScript (ES6+), TypeScript
- State Management
- Context API
- Redux (basic)
- Zustand
- Styling & UI
- Tailwind CSS
- Vanilla CSS, SASS
- Responsive and mobile-first design
- Figma
- Code translation
- Web APIs & Browser Features
- RESTful APIs
- LocalStorage, SessionStorage, Cookies
- Event handling
- AbortController for request cancellation
- Authentication & Security
- JWT-based authentication
- OAuth concepts
- Role-based access control (basic)
- Tooling & Workflow
- Git, GitHub
- Postman
- Vercel, Netlify
- Peer code reviews & documentation
- Testing & Quality (Exposure)
- Jest
- React Testing Library
- Cypress (basic familiarity)
